Operated by Technologie-Region K.E.R.N e.V./ Germany, Technopôle Brest-Iroise/ France and Pomerania Development Agency Co./ Poland

PROJECT PART-FINANCED  
 BY THE EUROPEAN UNION

Acting as Lead Partner we are pleased to invite you to the final event of the INTERREG IIIC-Project InterMareC. This final event will take place December 11th 2007, 4 - 6 p.m. in Kiel at the home of Parliament (Landeshaus).

InterMareC, a cooperation project between the three coastal regions Schleswig-Holstein (Germany), Brittany (France) and Pomorskie (Poland) does focus on the initiation, development and establishment of an interregional maritime cluster.

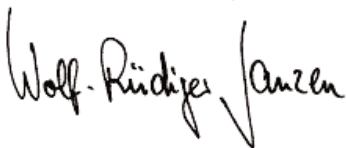

Using the strategy of an operational cluster facilitation associated with the provision of grants for sub-projects, InterMareC has started to create significant impulses for the maritime economy in the three regions.

The development of innovative coopeations between maritime companies, scientists and public authorities has been identified as tool to utilise existing potentials for the market. Thereby, InterMareC concentrates on three thematic fields:

- Offshore and Oceanographic Technologies
- Coastal Services and Activities
- Ship- and Boat-Building Supply and Services

Within 20 sub-projects more than 79 participants from all three regions have been involved for the last 42 months.

During this final event high representatives from all partner regions as well as sub-project participants will represent the importance of InterMareC within our three regions as well as its importance for interregional cooperation and cluster development within the Baltic Sea and the Atlantic Region.

Consul Wolf-Rüdiger Janzen  
(Chairman of the InterMareC Steering Committee)
